

Eastrail to NE Spring Boulevard Trail Link

Bid Number 26012

Questions and Answers

5/18/2026

Q1: Does the infill panel need to be the specific grating shown in the detail, or would an approved alternative be acceptable?

A1: Please bid per the Plans and Special Provisions. Bids should be based on the infill panel details shown in the Plans.

Q2: Does the railing system need to be fabricated to a true radius, or would segmented sections be acceptable to follow the radius condition during installation?

A2: Please see note 1 on sheet WA07 and note 5 of ST02 of the Plans. Please follow WSDOT Standard Plan L-5.10 for the fall protection rail.

Q3: Can you provide cross sections so we are able to verify the location and approximate volume of 4,000CY of roadway excavation?

A3: We will not be providing cross sections at this time. The majority of the roadway excavation consists of the 2' of excavation under the trail (or under the wall in most locations). Much of the rest of the excavation is in the wetland area.
