ADDENDUM 4 – 11/05/26

1. Can you confirm the design wave criteria / wave factor used for the float design as named in the specs and plans (significant wave height, period, wavelength, fetch, direction, freeboard, freeboard under load, live loads, and any other wave or freeboard criteria called out, including on G1.02 and Spec 35 51 13)? Please confirm what is in the documents issued and provide anything that is missing.

   The Design Criteria shall be per G1.02 of the drawings.

2. Will the Port / Facet consider alternate float systems if domestic fabricators cannot meet the specified 24" galvanized steel pipe pontoon system, 25-year warranty, and schedule?

   The pontoon shall be galvanized steel pipes, no other alternate float systems are accepted.

3. What warranty term will the Port accept, or is a shorter manufacturer warranty allowed so we can bid?

   The warranty on the floats must be a 25-year minimum.
